

# PRODUCTION OF ALUMINIUM SLUGS

## Project

Production of aluminium discs using primary aluminium produced in nearby refineries

## Project Concept

- ▶ To establish a 12 000 ton per annum greenfield aluminium slug plant in the Richards Bay Industrial Development Zone
- ▶ The slugs could be sold to global manufacturers of aerosol cans, medicinal tubes, bottle caps and automotive filter casings
- ▶ The projected long-term expansion includes the manufacture of alloyed slugs

## Location

- ▶ The Richards Bay Industrial Development Zone
- ▶ Located 170 km north of Durban

Richards Bay Industrial Development Zone

## Current Status

The project remains at the conceptual stage

## Feasibility Study

A feasibility study has been completed

## Business Plan

An updated business plan has been completed

## Required Investment

- ▶ The latest estimated capex required is ZAR 100 million (USD 11.2 million). Plant costs, transport, and assembly amount to ZAR 60 million (USD 6.7 million)
- ▶ Letters of intent are available from local company Nampak as well as various international markets from Italy, France, Spain and USA
